

Publications of the Publishing House of Warsaw University of Technology (OWPW — Oficyna Wydawnicza Politechniki Warszawskiej) and its publication catalogues are available in most technical-scientific bookshops in Poland, as well as in reading rooms and libraries of universities.

The full offer of our publications is presented on the Internet at <http://www.wydawnictwopw.pl>

The Publishing House of Warsaw University of Technology offers also mail-order sale (national and international deliveries)

Triggers for the Pierre Auger Observatory, the Current Status and Plans for the Future

Zbigniew Szadkowski

# Triggers for the Pierre Auger Observatory, the Current Status and Plans for the Future

Editorial Series on ACCELERATOR SCIENCE

ISSN 978-83-7207-822-3

9 788372 078223

Institute of Electronic Systems  
Warsaw University of Technology

<b>From the Author .....</b>	<b>9</b>
<b>1 Introduction .....</b>	<b>11</b>
1.1 High Energy Cosmic Rays.....	12
1.2 Extensive Air Showers.....	14
1.3 The GZK cut-off .....	15
1.3.1 “Bottom–up” production .....	17
1.3.2 “Top–down” production .....	18
1.4 HiRes vs. AGASA discrepancy .....	18
1.5 Overview of the Fluorescence Detection.....	19
1.5.1 Fluorescence Detector in the Pierre Auger Observatory .....	24
1.6 Overview of the Surface Detection techniques.....	27
1.6.1 Surface Detectors in the Pierre Auger Observatory .....	28
1.7 Overview of triggers in the Pierre Auger Observatory.....	34
1.7.1 FD triggers.....	34
1.7.2 SD triggers.....	38
1.7.3 Muon flux for an absolute energy calibration .....	40
<b>2 The 2<sup>nd</sup> Level Trigger in the Pierre Auger Fluorescence Detector .....</b>	<b>43</b>
2.1 Overview.....	43
2.2 Topology of patterns.....	44
2.3 Scanning of the matrix.....	47
2.4 “Angle” classes .....	49
<b>3 The 1<sup>st</sup> Level Trigger in the Pierre Auger Surface Detector .....</b>	<b>51</b>
3.1 APEX design.....	51
3.1.1 Chronological sequence of output data in the fast channel .....	53
3.1.2 Hierarchical triggers .....	53
3.1.3 Triggers in the fast channel .....	55
3.1.4 Pipelined internal routines structure .....	57
3.1.5 The memory structure in the fast channel .....	58
3.1.6 Readout system in the fast channel.....	59
3.1.7 Timing for triggers in the fast channel .....	62
3.1.8 Data integrity .....	65
3.1.9 Triggers in the slow channel.....	67
3.1.10 Conclusions from the Engineering Array phase.....	72
3.2 ACEX design .....	73
3.2.1 The general concept.....	73
3.2.2 Synchronization of sub–channels .....	75
3.2.3 Readout system.....	77
3.3 Cyclone design.....	79
3.3.1 Introduction .....	79
3.3.2 Internal routines.....	80
3.3.3 PLL and DMA transfer optimization.....	81
3.3.4 Tests of the FEB and performance in the field.....	84
3.3.5 Apparent differential non-linearity.....	87
3.3.6 Noise vs. locations of the FPGA and the Dual-Port RAM.....	89

3.3.7 Custom monitoring .....	92
3.4 Cyclone III design.....	100
<b>4 New triggers for the Pierre Auger Surface Detector.....</b>	<b>103</b>
4.1 Area over Threshold (AoT) trigger.....	103
4.2 Spectral triggers for horizontal and very inclined showers .....	108
4.2.1 16-point DFT based on the Radix-2 FFT algorithm.....	112
4.2.2 16-point DCT algorithm .....	120
4.2.3 DFT vs. DCT .....	127
4.2.4 Preliminary assumptions for a trigger .....	130
4.2.5 Implementation of the code into a FPGA.....	133
4.2.6 Accuracy.....	137
<b>5 Performance of the Pierre Auger Observatory .....</b>	<b>139</b>
5.1 Fluorescence Detector.....	139
5.2 Surface Detector.....	141
5.3 Hybrid mode .....	142
<b>6 Preliminary results from the Pierre Auger Observatory (2007).....</b>	<b>146</b>
6.1 First Estimate of the Primary CR Energy Spectrum above 3EeV .....	146
6.2 Upper limit on the primary photon fraction from the Pierre Auger Observatory .....	151
6.3 Anisotropy around the Galactic Center at EeV energies .....	154
<b>7 Auger Muons and Infill for the Ground Array .....</b>	<b>158</b>
7.1 Introduction.....	158
7.2 Energy.....	158
7.3 Composition.....	160
7.4 Galactic sources and propagation .....	162
7.5 Extragalactic propagation and superposition of the extra-galactic and Galactic fluxes.....	164
7.6 Degeneracy of astrophysical models .....	167
7.7 Composition at the sources and its observational counterpart.....	167
7.8 Tasks for AMIGA.....	171
7.9 Capabilities of the Infill Array.....	172
7.10 Underground hardware .....	177
7.11 Triggers, data flow and synchronization between the underground electronics and the Auger surface detector.....	180
<b>8 High Elevation Auger Telescopes (HEAT) .....</b>	<b>185</b>
8.1 Introduction.....	185
8.2 Auger FD and the HEAT Telescopes .....	186
8.3 First measurements .....	189
6	
<b>9 Triggers for a detection of radio emission from cosmic ray air showers .....</b>	<b>191</b>
9.1 Introduction.....	191

9.2 Auger Engineering Radio Area (AERA).....	193
9.2.1 Results of phase 1 .....	194
9.2.2 Strategy for Phase 2.....	195
9.3 Synchrotron radiation .....	195
9.4 Synchrotron-theory: electron-positron pairs.....	197
9.5 Experimental setup .....	198
9.5.1 Antenna.....	198
9.6 Electronics .....	200
9.6.1 Digital front-end electronics.....	202
9.6.2 1 <sup>st</sup> prototype based on Stratix EP1S40F1020I6.....	204
9.6.3 Next generation based on Cyclone III EP3C80F780C6.....	215
<b>10 Results from the Pierre Auger Observatory on basis of data till June 2009 .....</b>	<b>219</b>
10.1 Measurement of the CR energy spectrum above $10^{18}$ eV using the Pierre Auger Observatory .....	219
10.2 Correlation of the Highest Energy Cosmic Rays with Nearby Extragalactic Objects in Pierre Auger Observatory Data.....	222
10.3 Limits on the diffuse flux of ultra high energy neutrinos set using the Pierre Auger Observatory .....	227
<b>11 Summary.....</b>	<b>234</b>
<b>12 Abbreviations.....</b>	<b>235</b>
<b>13 References .....</b>	<b>237</b>
